Sintel Group Inc (SGI) is a service-disabled, veteran-owned small business and small disadvantaged business. Our core competencies include Intelligence Analysis Services and Computer Network Operations/Cyber Exploitation Services. Our leadership team has a broad range of experience with both commercial and government customers.

Intelligence Analysis Services (Analysis and Production/Data Acquisition)

- Experience in end-to-end analysis, research, traffic analysis, target analysis, content analysis, knowledge and use of DNI and DNR methodologies, or database population, maintenance and usage.
- Considerable SIGINT reporting experience, working knowledge of reporting guidance and procedures, experience drafting reports, quality control of product reports, and editing product reports.
- Experience applying geospatial research and analysis techniques against any location-related data.
- Physical and social network mapping and analysis skills and experience with collection systems and metadata databases.
- Disciplines include SIGINT, HUMINT, MASINT, GEOINT, IMINT, Open Source and Counter Intelligence

Computer Network Operations / Cyber Exploitation

- Technical proficiency in the following areas: Operating system and network analysis, Malicious code analysis, Intrusion detection, penetration testing, packet analysis, scanning and detection, and network & security forensics
- Hands-on experience with network protocols, network programming, web technologies, and router/firewall technologies
- System/network administration, design and lab management

Why Sintel Group Inc?

The founders of SGI have over 20 years of combined experience in high level executive management around the world. Their experience is a diverse mix of public, private, military and federal government leadership that offers a rare insight into how all those worlds collide when managing a company that is focused on serving the intelligence community. The combined success and leadership of the founding partners have inspired them to take an innovative approach to how personnel management can change the way businesses can improve the quality of service to the intelligence community.
